

## GeneReviews — Review Processes

Created: June 3, 2013; Revised: October 22, 2020.

### Peer Review

Consistent with the process used by scholarly journals, each new *GeneReview* is reviewed by two to four experts on the disorder who check the entry for accuracy, completeness, and clinical relevance. Reviewers are anonymous to authors.

### Updates

Every four to five years, *GeneReview* chapter author(s) and *GeneReviews* editorial staff undertake a comprehensive review of chapter content and format to ensure its currency and continuing clinical relevance to diagnosis, patient care, and genetic counseling.

### Revisions

Time-critical revisions to a *GeneReview* are initiated by the editorial staff or the author(s) whenever a clinically significant development (e.g., identification of a gene, advances in treatment) needs to be published.

### License

GeneReviews® chapters are owned by the University of Washington. Permission is hereby granted to reproduce, distribute, and translate copies of content materials for noncommercial research purposes only, provided that (i) credit for source (<http://www.genereviews.org/>) and copyright (© 1993-2024 University of Washington) are included with each copy; (ii) a link to the original material is provided whenever the material is published elsewhere on the Web; and (iii) reproducers, distributors, and/or translators comply with the [GeneReviews® Copyright Notice and Usage Disclaimer](#). No further modifications are allowed. For clarity, excerpts of GeneReviews chapters for use in lab reports and clinic notes are a permitted use.
