

## Tutorials

Updated: July 1, 2024.

This chapter contains a collection of short video tutorials that highlight the features of the Bookshelf.

### Tutorial 1: Browsing

A student is just beginning his course in biology, and his teacher has recommended Bookshelf as a good source of information. The student explores which books are relevant to his studies.

The screenshot shows the top navigation bar of the National Library of Medicine website. It includes the NIH logo, the text "National Library of Medicine National Center for Biotechnology Information", and a "Log in" button. Below this is a search bar with a dropdown menu set to "Books", a search button, and links for "Browse Titles", "Advanced", "Help", and "Disclaimer".

The main content area features a large image of green microorganisms on the left and a dark blue box on the right with the heading "Bookshelf" and the text "Bookshelf provides free online access to books and documents in life science and healthcare. Search, read, and discover." Below this are three columns of links:

- Using Bookshelf:** Quick Start Guide, FAQ, Tutorials, Copyright and Permissions
- Read:** Browse Titles, New Releases (with RSS icon), PubReader
- Participate:** Authors and Publishers, How to Apply, Participation Agreement, File Submission Specifications

At the bottom, there are three sections: "New & Updated" (with a partial link to "Hansen's Disease: The Forgotten and..."), "Featured Titles" (with a partial link to "Assessing Progress on the Institute of..."), and "More Information" (with a link to "NLM Literature Archive").
