

## Quick Start Guide

Created: September 30, 2010; Updated: August 27, 2013.

From Bookshelf's [Browse Titles](#) page you may view all of Bookshelf's titles by title, first author/editor, publisher, publication year or type, or begin searching across the entire resource. You may [browse](#) and [search](#) across all content, or one book at a time.

By clicking on a book's cover image or hyperlinked title, you may access an individual publication's [Table of Contents page](#), from which you can begin browsing or searching the contents of that particular book.

Search results will be displayed on a separate page and organized by relevance (see [Displaying Your Search Results](#)).

For a quick look at Bookshelf and its features, also visit the [Tutorials](#) page.

## Search Tips

You may search Bookshelf like any other NCBI database, namely by

- searching on any word
- restricting the search term to a certain field using [Facets](#)
- using the [Advanced Search](#) option to search multiple fields, or
- applying filters to properties.

Here are some representative searches:

Find books by...	Search text
free text	<a href="#">mood sleep disorders</a>
author	<a href="#">alberts[au]</a>
editor	<a href="#">pagon[ed]</a>
title	<a href="#">Lactose Intolerance[Title]</a>
publisher	<a href="#">National Academies Press[Publisher]</a>
ISBN	<a href="#">0-8153-3218-1[ISBN]</a>
publication date (year)	<a href="#">2010[Year of publication]</a>

See [Advanced Searching](#) for more information about building specialized searches, viewing your search history, saving search results and viewing search details.
