dbSNP Data Dictionary

Created: July 7, 2005; Updated: February 18, 2014.

Where can I download a pdf version of the entire data dictionary (all tables and all variables)?

The content of the data dictionary is stored in a table which is dumped to a file called `db_DataDictionaryNew` in the `shared_data` directory of the dbSNP FTP site. The schema for table `db_DataDictionaryNew` is in ftp://ftp.ncbi.nih.gov/snp/database/shared_schema/. Please note that data dictionary is a "living" file in that we often update when there are changes in dbSNP's schema.(01/07/08)

How do I convert the `db_DataDictionaryNew.bcp` file to a well-formatted pdf or doc file for printing?

The data file is tab delimited so could you try loading it into an Excel spreadsheet.(01/09/08)
